Bliss component racks and reel carts are designed to conveniently store reels of various sizes. Shelves are adjustable and accommodate movable dividers. Bliss component racks and reel carts are designed to safely store component reels from 7" to 15" and facilitate rapid visual inventory control. The unique contoured shelf design is superior to wire, eliminating sharp metal edges that cause reel and component damage. Bliss carts protect fragile paper and plastic reels from damage, eliminating expensive downtime from feeder malfunction. All widths and diameters of reels can be accommodated on the same shelf. As with all Bliss carts, ESD protection is built in.
